Flagstone & Path Stone

1300 Small Pavers/EZ Stack Wall Rock

1.5" to 2.5" thick | 6" to 12" approximate length/width

Our Small Pavers/EZ Stack wall rock feature irregular shapes in length and width, but are uniform in thickness across the individual stone. Various uses include: small walls up to 24" tall, borders, patios and pathways. Easy to handle and place by the novice or professional. Paver applications cover approximately 70-80 square feet per ton. The wall rock applications cover approximately 20-25 square feet per ton.

1310 Standard Patio Stone

2" to 3" thick | 10" to 18" approximate length/width

Our path and patio stone is ideal for walkways and patios. Earth warm color will add a little extra to your landscape design. Covers approximately 45-60 square feet per ton.

1330 Pathstone

1.5" to 3.5" thick | 10" to 18" approximate length/width

Great for walkways, patios, waterfalls and spillways. Similar in size to our Patio Paver, but has a tapered thickness. Covers approximately 85-95 square feet per ton.

1336 Patio Mix

2.5" to 3.5" thick | 18" to 36" approximate length/width

Path and patio stone. Large version of the Pathstone with some tapered thickness.

1362 1" Thin Large Patio Mix

Premium-grade beautiful large flat patio stone ideal for large patio type areas. The color range is magnificent and the flatness is consistent. Covers approximately 120 square feet per ton.

1365 1" Thin Small Pavers

Flat patio and path stone that is very easy to use and very homeowner-friendly. Consistent grade of flatness with great color and patterning. Covers approximately 170 square feet per ton.

Wall Rock & Ledge Stone

1320 EZ Stack Wall Rock

3" to 5" thick | 12" to 18" approximate length/width

Selected for relatively smooth top and bottom surfaces and one straight edge face. Ideal for walls and edging up to 24" to 36" in height.

1322 Stackable

2" to 4" thick | 7" to 12" approximate length/width

Our midsize stackable wall rock is great for constructing walls 18" to 30" in height. Homeowner and contractor friendly. Covers approximately 20-25 square feet per ton.

1323 Landscape Stone

2" to 3" thick | 10" to 24" approximate length/width

This random flagstone features distinct colors making it an ideal stone for patios, stepping stones, dry stack walls and stair steps.

1370 One Man Wall Rock

4" to 10" thick | 8" to 14" approximate length/width | 30-85 pounds

Our famous One Man Wall Rock is sorted for relatively flat top and bottom surfaces, also in a size range that is easy to handle and easy to stack with professional results for a do-it-yourselfer or contractor.

1373 Country Wall Rock

6" to 18" approximate diameter

Wall rock mix with blocky and angular shapes for easy stacking.

1375 Two Man Wall Rock

6" to 16" thick | 12" to 24" approximate length/width | 85-350 pounds

These blocky boulders are ideal for the base of a tall one man wall. Also works well as corner stones, or makes a great wall all on its own.

1395 Cobblesone

4" to 6" thick | 6" to 8" approximate length/width

Our quarry cobble is great for many uses in the landscape — edging, small wall rock, raised beds and border stone, among others. Covers approximately 30-40 square feet per ton.

1410 Ledgestone

3" to 5" face | 3" to 5" bed depth | 14" to 16" length/width

Our ledgestone is dynamic when dry-stacked and spectacular with a mortar joint. Covers approximately 40-50 square feet per ton.

Stairs, Steps and Accent Boulders

1351 Molalla Large Flagstone

3" to 8" thick | 15" to 36" approximate length/width

This stone is ideal for single step stairways and wall building. Approximately eight per pallet. Average weight is 400 pounds apiece. This product is ideal for heavy traffic areas, stair landings, seat walls, benches, bridges and garden tables.

1390 Wall Rock/Stairway

5" to 8" thick | 12" to 18" approximate length/width

This rock selection is ideal for use for stairway treads on steeper slopes and wall construction. As with most of our products, they feature relatively flat top and bottom surfaces for easy placement or stacking. They also feature at least one straight edge and have uniform thickness. Steps made easy! Covers approximately 30-35 square feet per ton.

1520 Accent Boulders

10" to 36" thick | 24" to 42" approximate length/width

This boulder group is composed of roughly angular, blocky stone with terraced edges that make for excellent water feature stone, natural rock outcroppings, staggered living boulder walls, monuments and barrier rocks.
